## PROJECTS

### COLD STORAGE

Jan 2025 - Present

#### Freelancing Team Project

A powerful web application designed to manage vehicle details, specific product information, and support dynamic end-level user creation.

This awesome product is built using Next.js, Tailwind CSS, MongoDB, Node.js, and Express.js to ensure a seamless and efficient user experience.

### CLOUD NOTEBOOK

Jan 2024 - Feb 2024

#### Individual Project

Cloud Notebook is a web-based application that allows users to securely manage their notes. Users can create an account, log in with their credentials, and add, update, or delete their personal notes anytime.

The project is built with a powerful tech stack including Next.js, Tailwind CSS, MongoDB, Node.js, and Express.js to ensure a fast, responsive, and secure experience.

### PORTFOLIO WEBSITE

Apr 2024 - May 2024

#### Individual Project

A modern, responsive website designed to showcase my skills, projects, and achievements. It highlights my expertise in web development and provides visitors with a seamless way to learn about my work, download my resume, and get in touch.

Built using Next.js, Tailwind CSS, and other modern web technologies to ensure fast performance, beautiful design, and a great user experience.
